

The lack of information provided to the public as to the exact content of the proposed rule changes alarms me, an American citizen. And the lack of coverage of the issue by the media as a whole - whose owners stand to profit - should concern everyone, including the esteemed members of the Commission. I urge you to please delay voting on any proposed changes, particularly deregulation, until you have widely publicized, and allowed for broad debate, the entire issue. As a start, please publish the findings of your research and the exact changes you are proposing. Thank you.
